Who We Serve — Eligibility & Billing Detail for thezcs.com

Oct 13, 2026 · @Doctor ALi

This document gives the exact "Who We Serve" content for each service bar on thezcs.com — which practice types are eligible, and which patients can be billed under each program. Built for direct handoff to whoever is implementing the website.

Purpose / Developer Note

This document replaces the generic "Who We Serve" copy with specific, program-by-program eligibility detail. Use it to build out the "Who We Serve" portion at the bottom of each service bar/category (Care Management & Monitoring, Revenue Cycle Management, Virtual Staffing & Administrative Support) on **thezcs.com**.

Each section below gives:

1. Which practice types/specialties are eligible to offer that service
2. Which patients can actually be billed under that program (the payer-side eligibility)

Compliance note (carry this through to the live site): Do not state these as guarantees. Eligibility must be confirmed per patient and per payer at the time of service. Use language like "may qualify" or "subject to eligibility" rather than firm promises, consistent with the compliance notes already in the SEO workbook.

Care Management & Monitoring — Who We Serve

Chronic Care Management (CCM)

Eligible practices: Family Medicine, Internal Medicine, Geriatric Medicine, General Practice. **Patients who can be billed:** Medicare Part B patients with 2 or more chronic conditions expected to last 12 months or longer (e.g., hypertension, diabetes, COPD, chronic kidney disease, depression, arthritis). Patient must provide documented consent.

Principal Care Management (PCM)

Eligible practices: Cardiology, Endocrinology, Pulmonology, Nephrology, Neurology, and other specialty practices managing one dominant condition; also usable by Primary Care/Internal Medicine for a single high-risk condition. **Patients who can be billed:** Medicare Part B patients with one complex, high-risk chronic condition expected to last at least 3 months. Cannot be billed for the same patient, same month, alongside CCM by the same provider.

Remote Patient Monitoring (RPM)

Eligible practices: Cardiology, Endocrinology, Pulmonology, Nephrology, Primary Care, Internal Medicine — any practice using connected devices (BP cuffs, glucometers, pulse oximeters, weight scales). **Patients who can be billed:** Medicare Part B patients with at least one acute or chronic condition warranting monitoring, with an established provider relationship and written consent on file.

Remote Therapeutic Monitoring (RTM)

Eligible practices: Orthopedics, Physical Therapy / PM&R, Pain Management, Pulmonology — also billable by PTs, OTs, and SLPs, not just physicians. **Patients who can be billed:** Patients needing respiratory or musculoskeletal monitoring, pain management, or therapy adherence tracking, using an FDA-defined device or software as a medical device, with documented consent.

Transitional Care Management (TCM)

Eligible practices: Hospitalist / Hospital Medicine groups, Cardiology, Primary Care, Internal Medicine — any practice managing patients immediately after hospital discharge. **Patients who can be billed:** Patients recently discharged from an acute care hospital, inpatient psychiatric unit, skilled nursing facility, or long-term care hospital, returning to the community. Requires contact within 2 business days of discharge and a face-to-face visit within 7–14 days depending on complexity.

Revenue Cycle Management — Who We Serve

Eligible practices: Any practice, any specialty. RCM support (medical billing, medical coding, provider credentialing, and accounts receivable follow-up) is not tied to a specific condition or patient population — it applies to the practice's overall claims and revenue workflow.

Includes, without limitation: Family Medicine, Internal Medicine, Geriatrics, Cardiology, Endocrinology, Pulmonology, Nephrology, Neurology, Orthopedics, Physical Therapy, Pain Management, OB-GYN, Dermatology, Behavioral Health/Psychiatry, Urgent Care, Pediatrics, multi-specialty groups, and Federally Qualified Health Centers (FQHCs).

Patients who can be billed: Not applicable in the same sense as Care Management — RCM services work on the practice's existing patient claims across all payers (Medicare, Medicaid, and commercial insurance), rather than enrolling specific patients into a program.

Virtual Staffing & Administrative Support — Who We Serve

Eligible practices: Any practice, any specialty. Virtual staffing roles (Medical Scribe, Medical Scheduler, Medical Receptionist, Patient Care Coordinator, Virtual Assistant) support day-to-day operations that every outpatient practice has, regardless of what conditions it treats.

Includes, without limitation: the same full list as Revenue Cycle Management above — Family Medicine, Internal Medicine, Geriatrics, Cardiology, Endocrinology, Pulmonology, Nephrology, Neurology, Orthopedics, Physical Therapy, Pain Management, OB-GYN, Dermatology, Behavioral Health/Psychiatry, Urgent Care, Pediatrics, multi-specialty groups, and FQHCs.

Patients who can be billed: Not applicable — Virtual Staffing is an operational/administrative support service for the practice itself, not a billable patient-care program.

Summary Table — Quick Reference for All Service Bars

Service Bar	Eligible Practices	Patient Billing Eligibility
CCM	Family Medicine, Internal Medicine, Geriatrics, General Practice	Medicare Part B, 2+ chronic conditions, 12+ months, documented consent
PCM	Cardiology, Endocrinology, Pulmonology, Nephrology, Neurology, Primary Care	Medicare Part B, 1 high-risk condition, 3+ months

Service Bar	Eligible Practices	Patient Billing Eligibility
RPM	Cardiology, Endocrinology, Pulmonology, Nephrology, Primary Care	Medicare Part B, acute/chronic condition, device data, consent
RTM	Orthopedics, PT/PM&R, Pain Management, Pulmonology	Respiratory/MSK monitoring, FDA-defined device/app, consent
TCM	Hospitalist, Cardiology, Primary Care, Internal Medicine	Recently discharged patients, contact within 2 business days, visit within 7–14 days
RCM	Any practice, any specialty	N/A — works on existing claims across all payers
Virtual Staffing	Any practice, any specialty	N/A — administrative/operational support, not a billable program

For the website builder: place each program's "Eligible practices" and "Patients who can be billed" text directly under the corresponding service page's "Who We Serve" section, and use the summary table above as a quick-reference block on the main Care Management & Monitoring category page.
