Zenith Care Solutions: Service Page Copy

Unique website copy for 13 service pages, matching your current page structure

How to Use This Document

Every service below has its own copy block in the same order as your Services menu. Each block follows the layout your pages already use: meta description, hero, trust strip, six 'what we handle' cards, three-step process, three FAQs and a closing call to action. Paste each section into its own page.

What was causing the repeated CCM content

The main content of non-CCM pages is already different, but three shared elements repeat CCM wording on every page. Replace them with the per-page versions in each block:

Shared element	Problem today	Fix
Trust strip under the hero	Shows 'CPT 99490 / 99439 / 99487...' and 'Inside your EHR' on every page, even billing, coding and credentialing	Use the four trust items written for each service
Footer email link	Subject line is always 'CCM Inquiry'	Use the email subject written for each service
WhatsApp button	Pre-filled text is always 'I'd like to learn about CCM'	Use the WhatsApp message written for each service

The CCM page can stay as it is. The two homepage program cards (CCM and Patient Care Coordinator) can also stay.

Writing rules used

- No specific revenue, savings or turnaround numbers appear unless your site already states them. Add numbers only after you can support them.
- Code lists are given where your team will bill them. Confirm current definitions with your billing lead each January before publishing.

- The practice stays the billing provider and Zenith supplies the labor, matching your homepage model.

Care Management Programs

1. Principal Care Management (PCM)

Meta title: Remote Principal Care Management (PCM) | Zenith Care Solutions

Meta description: Remote Principal Care Management for U.S. practices. Monthly care management for patients with one serious, high-risk condition. PharmD-led, HIPAA Business Associate, inside your EHR.

Eyebrow: Care Management Programs

Headline: Principal Care Management for the patient whose one condition needs close watching.

Intro: Some of your highest-risk patients do not have a long problem list. They have one serious condition, often managed with a specialist, that can send them to the hospital if it slips. Zenith clinical staff deliver monthly PCM outreach inside your EHR, so that one condition gets steady attention between visits. Your practice stays the billing provider.

Trust strip:

- PharmD-led clinical oversight
- HIPAA Business Associate
- Documentation inside your EHR
- CPT 99424 / 99425 / 99426 / 99427

What Zenith handles:

- **Eligibility screening:** We find patients with one qualifying high-risk condition and confirm coverage.
- **Condition-focused care plan:** A plan built around the single condition, with goals your provider signs.
- **Monthly outreach:** Calls and messages that check symptoms, readings and understanding.
- **Specialist coordination:** We keep the specialist, the pharmacy and your office on the same page.

- **Medication support:** Reconciliation and adherence follow-up for the drugs tied to that condition.
- **Time logs and notes:** Audit-ready documentation in your EHR every month.

How it works:

1. **Find the right patients.** We review your panel for patients with one serious condition who are not being managed under another monthly program.
2. **Deliver monthly management.** Clinical staff spend the required time each month on that condition and document it.
3. **You bill, we invoice.** Your practice bills the PCM codes. Zenith invoices you for the clinical labor.

FAQs:

- **How is PCM different from CCM?** CCM is built for patients with two or more chronic conditions. PCM is built for patients with one complex, high-risk condition.
- **Can a patient be in PCM and another program in the same month?** It depends on the codes and the billing provider. Your billing lead checks combinations against current CMS rules before any claim goes out.
- **Who bills for PCM?** Your practice bills. Zenith supplies the clinical labor and invoices you.

Email subject: PCM Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about Principal Care Management.

Closing line: Fifteen minutes to see which of your patients qualify for PCM.

2. Remote Patient Monitoring (RPM)

Meta title: Remote Patient Monitoring (RPM) Services | Zenith Care Solutions

Meta description: Remote Patient Monitoring for U.S. practices. Device setup, daily data review and patient outreach handled by clinical staff inside your EHR. PharmD-led and HIPAA-compliant.

Eyebrow: Care Management Programs

Headline: Remote Patient Monitoring that turns home readings into timely care.

Intro: Blood pressure cuffs and glucose meters only help if someone watches the numbers. Zenith staff onboard patients to their devices, review readings, and call when something drifts, so your provider hears about problems days before the next visit. Your

practice stays the billing provider.

Trust strip:

- PharmD-supervised data review
- HIPAA Business Associate
- Readings flow into your EHR
- CPT 99453 / 99454 / 99457 / 99458

What Zenith handles:

- **Patient selection:** Identify patients whose conditions benefit from home monitoring.
- **Device onboarding:** Walk each patient through setup, connection and first readings.
- **Daily data review:** Check incoming readings against thresholds your provider sets.
- **Out-of-range follow-up:** Call patients when readings cross the line and escalate per protocol.
- **Monthly interactive time:** Documented live contact with patients about their readings.
- **Billing-ready records:** Reading counts and time logs organized for the month.

How it works:

1. **Set the thresholds.** Your provider orders monitoring and sets the alert limits for each patient.
2. **Onboard and monitor.** We set up the patient, confirm readings arrive, and review them on a regular schedule.
3. **Escalate and document.** Concerning readings go to your clinician fast, and every contact is logged for billing.

FAQs:

- **Does Zenith supply the devices?** Device arrangements vary by practice. We confirm whether you use your own vendor or an existing platform during scoping.
- **What readings are required to bill?** RPM billing depends on a minimum number of days with transmitted readings in the month, plus documented interactive time. Your billing lead confirms the current rules.
- **Who responds to urgent readings?** Our staff follow your escalation protocol and reach your clinician. Emergencies are directed to emergency services.

Email subject: RPM Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about Remote Patient Monitoring.

Closing line: Fifteen minutes to see how RPM would run in your practice.

3. Remote Therapeutic Monitoring (RTM)

Meta title: Remote Therapeutic Monitoring (RTM) Services | Zenith Care Solutions

Meta description: Remote Therapeutic Monitoring for U.S. practices. Track therapy adherence, pain and function between visits with clinical staff working inside your EHR.

Eyebrow: Care Management Programs

Headline: Remote Therapeutic Monitoring for patients whose recovery happens at home.

Intro: Therapy plans, respiratory care and pain programs succeed or fail between appointments. RTM tracks whether patients are doing the work and how they are responding, such as therapy adherence, pain levels and function. Zenith staff collect and review that data, then reach out when progress stalls. Your practice stays the billing provider.

Trust strip:

- PharmD-supervised workflows
- HIPAA Business Associate
- Data reviewed inside your EHR
- CPT 98975 / 98977 / 98980 / 98981

What Zenith handles:

- **Patient enrollment:** Identify and onboard patients suited to therapeutic monitoring.
- **Adherence tracking:** Watch exercise, medication or therapy-use data from the monitoring tool.
- **Symptom and pain trends:** Review patient-reported pain, function and response over time.
- **Treatment-management contact:** Documented live contact to keep patients on plan.
- **Provider alerts:** Flag stalled progress or worsening symptoms to your clinician.
- **Monthly documentation:** Clear logs of data days and management time.

How it works:

1. **Define what to track.** Your clinician chooses the therapy goals and the data to monitor.
2. **Monitor and engage.** Staff review data and contact patients who fall behind.

3. **Report and bill.** You receive organized monthly records, bill the codes, and Zenith invoices for the labor.

FAQs:

- **How is RTM different from RPM?** RPM tracks physiologic readings like blood pressure. RTM tracks non-physiologic data such as therapy adherence, pain and function.
- **Which patients are a fit?** Typically musculoskeletal, respiratory and pain patients on a defined treatment plan. Your clinician decides who is appropriate.
- **What tools do patients need?** A device or app suited to the plan. We confirm the setup with you during scoping.

Email subject: RTM Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about Remote Therapeutic Monitoring.

Closing line: Fifteen minutes to see whether RTM fits your patients.

4. Transitional Care Management (TCM)

Meta title: Transitional Care Management (TCM) Services | Zenith Care Solutions

Meta description: Remote Transitional Care Management for U.S. practices. Timely post-discharge outreach, medication reconciliation and visit scheduling handled by clinical staff inside your EHR.

Eyebrow: Care Management Programs

Headline: Transitional Care Management that closes the gap after discharge.

Intro: The days after a hospital stay are when patients are most likely to be readmitted. TCM has strict deadlines, and missing them means missing both the care and the claim. Zenith staff make the post-discharge contact on time, reconcile medications and get the follow-up visit booked. Your practice stays the billing provider.

Trust strip:

- PharmD-led medication reconciliation
- HIPAA Business Associate
- Documentation inside your EHR
- CPT 99495 / 99496

What Zenith handles:

- **Discharge tracking:** Find out when your patients are admitted and discharged.

- **Two-business-day contact:** Reach the patient or caregiver within the required window.
- **Medication reconciliation:** Compare discharge medicines with the current list and flag differences.
- **Discharge record review:** Gather and organize the summary for your provider.
- **Follow-up visit scheduling:** Book the face-to-face visit within the required timeframe.
- **Community referrals:** Arrange home health, equipment and support services.

How it works:

1. **Catch the discharge.** We monitor admission and discharge notices and open a TCM case.
2. **Contact, reconcile, schedule.** Required outreach and medication work happen inside the deadline.
3. **Document and bill.** Your practice bills TCM after the visit. Zenith invoices for the labor.

FAQs:

- **What are the TCM deadlines?** Interactive contact is due within two business days of discharge. The face-to-face visit is due within 7 or 14 days depending on complexity.
- **Does TCM replace CCM?** They can serve the same patient at different times, but billing overlap rules apply. Your billing lead confirms combinations before claims.
- **How do you learn about discharges?** Through your hospital feeds, notifications and patient contact. We map your sources during setup.

Email subject: TCM Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about Transitional Care Management.

Closing line: Fifteen minutes to see how we would protect your post-discharge window.

Revenue Cycle Management

5. Medical Billing

Meta title: Remote Medical Billing Services | Zenith Care Solutions

Meta description: Remote medical billing for U.S. practices. Zenith billers submit clean claims, post payments and work denials inside your practice-management system. HIPAA-compliant, flat monthly rate.

Eyebrow: Revenue Cycle Management

Headline: Medical billing that gets your claims paid, faster.

Intro: A Zenith biller prepares, scrubs and submits your claims, posts payments and works denials inside your practice-management system. More of what you earn lands, with fewer days sitting in accounts receivable. Your practice stays the billing provider; Zenith does the billing labor.

Trust strip:

- HIPAA Business Associate
- BAA signed before access
- Role-based access in your system
- Flat monthly rate

What Zenith handles:

- **Claim preparation and submission:** Scrub and submit clean claims from your system.
- **Charge entry:** Accurate charges so claims go out complete the first time.
- **Payment posting:** Post ERAs and EOBs and reconcile against expected payment.
- **Denial management:** Work, correct and resubmit denied claims before they age out.
- **Eligibility and benefits:** Verify coverage to prevent front-end denials.
- **Patient statements:** Generate statements and follow up on balances.

How it works:

1. **Scope the work.** We map your specialties, payers and practice-management system.
2. **Match and onboard.** We place a biller with role-based access under a signed BAA.
3. **Bill and reconcile.** Your biller submits claims, posts payments and works denials in your system.

FAQs:

- **Does Zenith bill Medicare directly?** No. Your practice stays the billing provider. Zenith staff prepare and submit claims from your system under your accounts.
- **What systems do billers work in?** Your existing practice-management and EHR platform. We confirm compatibility when scoping.
- **How is medical billing priced?** A flat monthly rate based on scope, shared in your scoping call.

Email subject: Medical Billing Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about your Medical Billing service.

Closing line: Fifteen minutes to see how billing would work for your practice.

6. Medical Coding

Meta title: Remote Medical Coding Services | Zenith Care Solutions

Meta description: Remote medical coding for U.S. practices. Accurate ICD-10, CPT and E/M coding from charts inside your EHR, with compliance review. HIPAA-compliant and PharmD-supervised.

Eyebrow: Revenue Cycle Management

Headline: Medical coding that matches what you documented and what you can defend.

Intro: Under-coding leaves money behind, and over-coding invites audits. Zenith coders read the chart, assign the codes the documentation supports and flag gaps back to your provider before the claim goes out. The result is cleaner claims and fewer coding denials. Your practice stays the billing provider.

Trust strip:

- Pharmacist-supervised review
- HIPAA Business Associate
- Coding done inside your EHR
- ICD-10-CM / CPT / HCPCS

What Zenith handles:

- **Diagnosis coding:** Assign ICD-10-CM codes to the level of specificity the chart supports.
- **Procedure and E/M coding:** Select CPT and level-of-service codes from the documentation.
- **Documentation queries:** Ask providers to clarify unclear or incomplete notes.
- **Risk-adjustment capture:** Make sure documented chronic conditions are coded accurately.
- **Coding audits:** Review samples for accuracy and report patterns.
- **Code updates:** Apply annual code set changes to your workflow.

How it works:

1. **Define your specialty and volume.** We learn your visit types, templates and payers.
2. **Code from the chart.** Coders work in your EHR and send queries through your agreed channel.

3. **Review and improve.** You receive accuracy feedback and common documentation gaps.

FAQs:

- **Will coders change my documentation?** No. Coders assign codes from what is documented and send queries when something is unclear. Providers make any chart changes.
- **Do you code for specific specialties?** We scope by specialty, with focus on primary care, internal medicine and geriatrics.
- **How is accuracy measured?** Through periodic audit samples shared with your team.

Email subject: Medical Coding Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about your Medical Coding service.

Closing line: Fifteen minutes to see how coding support would fit your charts.

7. Provider Credentialing

Meta title: Provider Credentialing and Payer Enrollment | Zenith Care Solutions

Meta description: Remote provider credentialing and payer enrollment for U.S. practices. Applications, CAQH upkeep and revalidation tracked from start to approval. HIPAA-compliant.

Eyebrow: Revenue Cycle Management

Headline: Credentialing that gets your providers enrolled and keeps them that way.

Intro: A provider who is not enrolled cannot bill, and every week of delay is revenue you cannot recover. Zenith handles the paperwork, the follow-up calls and the deadlines for new providers, new locations and renewals, so approvals do not stall in someone's inbox. Your practice stays in control of every application.

Trust strip:

- HIPAA Business Associate
- Sensitive provider data handled under a BAA
- Single point of contact per file
- Medicare, Medicaid and commercial payers

What Zenith handles:

- **Payer enrollment applications:** Prepare and submit applications to Medicare, Medicaid and commercial plans.
- **CAQH profile management:** Build and keep the profile complete, attested and current.
- **License and document tracking:** Monitor expirations for licenses, DEA, malpractice and board certifications.
- **Application follow-up:** Chase payers on a set schedule until a decision arrives.
- **Revalidation and recredentialing:** Track due dates so enrollment never lapses.
- **Group and location changes:** Handle additions, terminations and address updates.

How it works:

1. **Collect and verify.** We gather provider documents and check them against payer requirements.
2. **Submit and follow up.** Applications go out and each file is followed until approved.
3. **Maintain.** We track renewals and updates so your enrollment stays active.

FAQs:

- **How long does credentialing take?** Timelines vary widely by payer and application quality. We give a realistic range per payer during scoping and do not promise a fixed date.
- **Do you need our login credentials?** We work through delegated access where payers allow it, so your providers keep ownership of their accounts.
- **Can you help with a provider who is already enrolled?** Yes. Many practices start with a cleanup of expiring documents and upcoming revalidations.

Email subject: Credentialing Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about Provider Credentialing.

Closing line: Fifteen minutes to review your providers' enrollment status.

8. Accounts Receivable (AR) Follow-Up

Meta title: Accounts Receivable Follow-Up Services | Zenith Care Solutions

Meta description: Remote accounts receivable follow-up for U.S. practices. Work aged claims, appeals and unpaid balances to recover revenue. HIPAA-compliant and flat monthly rate.

Eyebrow: Revenue Cycle Management

Headline: Accounts receivable follow-up that recovers the money still owed to you.

Intro: Claims that sit unpaid for 60, 90 or 120 days rarely resolve themselves. Zenith staff work your aging report from oldest to newest, call payers, correct and appeal denials, and tell you why money is stuck. You see fewer old claims and a clearer picture of where revenue leaks.

Trust strip:

- HIPAA Business Associate
- Works inside your billing system
- Weekly aging reports
- Flat monthly rate

What Zenith handles:

- **Aging report review:** Prioritize claims by age, balance and likelihood of payment.
- **Payer follow-up:** Call and use payer portals to get status and next steps.
- **Denial appeals:** Prepare corrected claims and appeals within payer deadlines.
- **Underpayment checks:** Compare payments with contracted rates and flag shortfalls.
- **Patient balance follow-up:** Handle statements and balance outreach with respect.
- **Root-cause reporting:** Show which denial reasons and payers repeat.

How it works:

1. **Baseline your AR.** We review your aging report and set priorities with you.
2. **Work the claims.** Staff follow up, correct and appeal on a steady schedule.
3. **Report and prevent.** You receive progress reports and fixes for repeat denial causes.

FAQs:

- **Is this the same as medical billing?** Billing covers submitting claims and posting payments. AR follow-up focuses on collecting claims that are already late or denied. Many practices use both.
- **Do you work old claims?** Yes, within each payer's timely-filing and appeal limits. We tell you early which claims are still recoverable.
- **How do you report progress?** With regular aging summaries and a list of denial causes, shared on the schedule agreed during setup.

Email subject: AR Follow-Up Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about your Accounts Receivable follow-up service.

Closing line: Fifteen minutes to review your aging report together.

Virtual Staffing and Admin Support

9. Medical Scribe

Meta title: Remote Medical Scribe Services | Zenith Care Solutions

Meta description: Remote medical scribes for U.S. practices. Real-time or same-day note drafting inside your EHR so providers finish charts sooner. HIPAA-compliant.

Eyebrow: Virtual Staffing and Admin Support

Headline: A medical scribe so your providers can stop charting at night.

Intro: Documentation is the work that follows providers home. A Zenith scribe drafts the visit note in your EHR from the encounter, in your templates and your style, and the provider reviews and signs. Your clinicians spend more time with patients and less time catching up on charts.

Trust strip:

- HIPAA Business Associate
- Trained in medical terminology
- Works in your EHR and templates
- Provider reviews and signs every note

What Zenith handles:

- **Visit note drafting:** Capture history, exam and plan in your template.
- **Chart preparation:** Pull prior notes, labs and medication lists before the visit.
- **Order and referral staging:** Queue orders for the provider to approve.
- **Patient instructions:** Prepare after-visit summaries from the provider's plan.
- **Template and preference learning:** Match each provider's phrasing and workflow.
- **Same-day completion:** Drafts ready for review without a backlog.

How it works:

1. **Learn your style.** We review your templates and note preferences for each provider.
2. **Scribe the encounter.** The scribe documents in real time or from recorded workflow, as your policy allows.
3. **Review and sign.** The provider edits, approves and signs. The record is the provider's.

FAQs:

- **Does the scribe make clinical decisions?** No. Scribes document what the provider says and does. All clinical judgment and the final note stay with the provider.
- **Can scribes work live in the room?** Remote scribes can join by approved audio or video where your policy and patient consent allow it.
- **Do patients need to consent?** Your practice should follow its own consent policy and applicable state rules. We can help you draft patient notices.

Email subject: Medical Scribe Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about your Medical Scribe service.

Closing line: Fifteen minutes to see how scribing would fit your providers' day.

10. Medical Scheduler

Meta title: Remote Medical Scheduler Services | Zenith Care Solutions

Meta description: Remote medical schedulers for U.S. practices. Fill the calendar, reduce no-shows and manage cancellations inside your system. HIPAA-compliant.

Eyebrow: Virtual Staffing and Admin Support

Headline: A medical scheduler who keeps every provider's day full and organized.

Intro: An empty slot is lost revenue, and an overbooked day is a lost afternoon. A Zenith scheduler books the right visit type with the right provider, sends reminders, fills cancellations and works your waitlist, so the schedule runs the way you designed it.

Trust strip:

- HIPAA Business Associate
- Works inside your scheduling system
- Follows your visit-type rules
- Dedicated schedulers, not rotating agents

What Zenith handles:

- **New and follow-up booking:** Book the correct visit type and length for each patient.
- **Appointment reminders:** Confirm visits by call, text or portal per your policy.
- **No-show recovery:** Reach out to reschedule missed visits promptly.
- **Cancellation fills:** Offer open slots to waitlisted patients.
- **Recall scheduling:** Bring back patients due for chronic care and preventive visits.

- **Calendar maintenance:** Keep provider templates, holds and blocks accurate.

How it works:

1. **Set your rules.** We document visit types, durations, provider preferences and booking limits.
2. **Schedule and confirm.** The scheduler books, reminds and manages changes daily.
3. **Review the calendar.** You receive utilization and no-show reports to refine the template.

FAQs:

- **Will the scheduler take calls?** Scheduling calls can be included. Full front-desk call handling is covered by our Medical Receptionist service.
- **Can the scheduler triage symptoms?** No. Clinical questions go to your clinical staff by the process you define.
- **Which scheduling systems do you use?** Your existing practice-management or EHR scheduling module. We confirm compatibility when scoping.

Email subject: Medical Scheduler Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about your Medical Scheduler service.

Closing line: Fifteen minutes to see how a scheduler would fit your calendar.

11. Medical Receptionist

Meta title: Remote Medical Receptionist Services | Zenith Care Solutions

Meta description: Remote medical receptionists for U.S. practices. Answer calls, route messages and handle patient intake with a professional front-desk voice. HIPAA-compliant.

Eyebrow: Virtual Staffing and Admin Support

Headline: A medical receptionist who answers every call like part of your team.

Intro: The phone is your practice's first impression. A Zenith receptionist answers in your practice's name, greets patients warmly, routes the call to the right person and records clear messages, so patients are not left on hold and your in-house team is not constantly interrupted.

Trust strip:

- HIPAA Business Associate

- Answers in your practice's name
- Follows your call-routing rules
- Clear escalation for urgent calls

What Zenith handles:

- **Inbound call handling:** Greet, identify the reason and direct each call.
- **Message taking:** Record accurate messages and deliver them through your approved channel.
- **Patient intake:** Collect demographics and insurance details for new patients.
- **Insurance card capture:** Gather and upload coverage information.
- **Refill and records requests:** Log requests and route them to the right team.
- **Urgent-call escalation:** Send emergencies and urgent clinical concerns to your clinician right away.

How it works:

1. **Build the call script.** We document your greetings, hours, routing and escalation rules.
2. **Answer and route.** The receptionist handles calls during your agreed hours.
3. **Report.** You receive call logs and summaries of common patient questions.

FAQs:

- **What happens with an urgent clinical call?** The receptionist follows your escalation script, tells emergency callers to contact emergency services and notifies your clinician.
- **Can the receptionist book appointments?** Yes, where you grant scheduling access. Heavy scheduling workloads are better served by our Medical Scheduler.
- **Which hours are covered?** Hours are set during scoping and depend on staffing and your time zone.

Email subject: Medical Receptionist Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about your Medical Receptionist service.

Closing line: Fifteen minutes to see how we would answer your phones.

12. Patient Care Coordinator

Meta title: Remote Patient Care Coordinator Staffing | Zenith Care Solutions

Meta description: Remote patient care coordinators for U.S. practices. Pre-visit prep, referrals, prior authorizations and inbox triage at a flat monthly rate, inside your EHR.

Eyebrow: Virtual Staffing and Admin Support

Headline: A patient care coordinator who clears the admin that clogs your clinical team.

Intro: Nurses and medical assistants lose hours every day to referrals, prior authorizations and inbox messages. A Zenith care coordinator takes that work remotely, inside your EHR, so your in-house team stays focused on patients. Staffing is a flat monthly rate.

Trust strip:

- PharmD-supervised
- HIPAA Business Associate
- Works inside your EHR
- Flat monthly rate

What Zenith handles:

- **Pre-visit chart review:** Prepare each chart with open gaps, results and records before the visit.
- **No-show follow-up:** Reach patients who missed a visit and rebook.
- **Referral tracking:** Send referrals, confirm scheduling and chase consult notes.
- **Prior authorizations:** Prepare and follow up on authorization requests.
- **Insurance verification:** Confirm coverage before the visit.
- **Portal inbox triage and care-gap outreach:** Sort messages by urgency and contact patients due for care.

How it works:

1. **Map your workflows.** We list the tasks to hand off and the rules for each.
2. **Place your coordinator.** A coordinator joins your EHR with role-based access under a BAA.
3. **Track and adjust.** You review task completion and widen or narrow the scope.

FAQs:

- **How is this different from CCM?** CCM is a billable monthly clinical program for chronic patients. A care coordinator handles daily administrative and outreach work for the whole practice.

- **Can the coordinator give clinical advice?** No. Clinical questions go to your licensed staff by the process you set.
- **How is it priced?** A flat monthly rate based on scope, shared during the intro call.

Email subject: Patient Care Coordinator Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about your Patient Care Coordinator service.

Closing line: Fifteen minutes to scope the coordinator role for your practice.

13. Virtual Assistant

Meta title: Medical Virtual Assistant Services | Zenith Care Solutions

Meta description: Remote virtual assistants for U.S. medical practices. Inbox management, data entry, records requests and office tasks at a flat monthly rate. HIPAA-compliant.

Eyebrow: Virtual Staffing and Admin Support

Headline: A virtual assistant for the office tasks that never end.

Intro: Every practice has a pile of tasks that are important but not clinical: records requests, forms, data entry, vendor emails and reports. A Zenith virtual assistant takes that pile off your team's desk, working under a BAA with the access you choose to give.

Trust strip:

- HIPAA Business Associate
- BAA signed before any access
- Access limited to what the task needs
- Flat monthly rate

What Zenith handles:

- **Inbox and email management:** Sort, draft replies and flag items for the team.
- **Data entry and chart cleanup:** Keep demographics, insurance and document records accurate.
- **Records requests:** Send, track and file incoming and outgoing medical records.
- **Forms and paperwork:** Complete and route standard forms for review and signature.
- **Reports and spreadsheets:** Build recurring reports and track lists.
- **Research and vendor tasks:** Compare options and follow up with vendors.

How it works:

1. **List the tasks.** We write down what you want handed off and how you like it done.
2. **Grant limited access.** Your assistant gets only the system access the tasks need.
3. **Review weekly.** You check completed work and adjust the task list.

FAQs:

- **Can the virtual assistant see patient information?** Only if you grant it for a task, and only under a signed BAA. Many tasks need no patient data at all.
- **How is this different from a care coordinator?** A coordinator focuses on patient-facing workflows like referrals and authorizations. A virtual assistant covers general office and administrative work.
- **Is there a minimum commitment?** Terms are shared during the intro call.

Email subject: Virtual Assistant Inquiry

WhatsApp message: Hi Zenith, I'd like to learn about your Virtual Assistant service.

Closing line: Fifteen minutes to list the tasks you would hand off first.

Before You Publish

- Confirm current CPT definitions and time thresholds for PCM, RPM, RTM and TCM with your billing lead before listing codes on the pages.
- Check each FAQ answer against how Zenith actually operates (scribe live-in-room policy, device supply for RPM, credentialing access method, AR timely-filing limits). Change any answer that does not match reality.
- Add real numbers (turnaround times, accuracy rates, savings) only when you can support them.
- Apply the per-service email subject and WhatsApp message in the page footer and floating button so each page stops saying 'CCM'.
